Founder & product work

Tideframe Labs — Founder & product builder

Independent software studio in Vermont. Product direction, interface design, development, release operations, documentation, and support; includes AI-assisted development.

- **Modeboard:** released Mac utility for workspace profiles, supported settings, and restore workflows.
- **Rental Record:** released app for guided condition records, photographs, notes, and reports on iPhone, iPad, and Mac.
- **Lineup:** forthcoming television player and organizer for user-supplied sources on iPhone, iPad, and Apple TV.

Employment

Summer Conference Assistant

University of Vermont · University Events Services

May–August 2025

- First point of contact for 1,000+ conference guests, interns, and participants.
- Managed residence-hall check-in, check-out, and room assignments; coordinated with Housing, Dining, and Event Services.

Dining Server

Wake Robin Retirement Community

August 2021–December 2022

- Supported dining service and events in Shelburne, Vermont.
- Worked with colleagues to provide attentive, respectful service to residents.

Campus leadership

Co-Head of Marketing — Accounting Club · University of Vermont

September 2025–Present

- Promote networking events and professional programs through digital materials and social outreach.
- Coordinate student engagement initiatives with the executive board.

Co-Head of Marketing — Redstone Hall Council · University of Vermont

January–May 2024

- Created promotional materials for residence-hall events.
- Helped plan and execute student programs.

Selected independent projects

Trinity Redistricting — Originator & author

2026–Present

- Originated an independent, concept-stage housing feasibility proposal for UVM's Trinity Campus (1,750–2,000 beds, $375M–$530M illustrative capital study range); not an official UVM or City plan.
- Built an evidence ledger of 48 cited sources with a status label on every figure; published a proposal, memo, deck, and accessible document packet.
- Developed the public site and Trinity AI, a retrieval-augmented assistant (AI-assisted development).

Trinity Residential Design Studies — Independent portfolio study

November 2026–Present · in progress

- Directed AI-assisted schematic suite and apartment plans, a typical-floor test fit, and whole-building capacity scenarios from my own program and feedback.
- Directed and reviewed an AI-assisted conceptual development model comparing public-benefit and hypothetical private scenarios, with labelled illustrative inputs.

UVM LaundryLink — Student prototype

June 2025–Present

Room discovery, favorites, dark mode, and SMS notifications; AI-assisted front-end development. Temporarily offline while its server is offline.

Capabilities

Communication

Content and social media marketing, branding, campaign planning, public speaking.

Creative & media

Photography, video production and editing, graphic design.

Tools

Microsoft Office, Google Workspace, Canva, iMovie, PeopleSoft; basic Photoshop and Illustrator.

Housing & development studies

Independent housing feasibility research, directing AI-assisted schematic floor plans and test fits, and reading conceptual development models (Excel); self-directed, not professional practice.

Product work

Product definition, interface design, content organization, and AI-assisted software development.

Additional experience

Class website assistance — Prof. Katya Scollins

May 2023

Organized class webpage content, permissions, and attachments.

Consumer research participant — Dscout

January 2025–Present

Participated in 50+ consumer studies on retail, technology, and lifestyle topics; provided feedback on campaigns and product design.

Childcare and pet care — Private households · South Burlington

September 2017–September 2022

Provided childcare, pet care, and household support.
